

## **110 - Probe Thermometer Overview**

Minus 20 degrees Celsius - it's what most people would call really cold. But for others it's just a normal part of their working lives. People who need to carry out temperature measurements in such cold conditions face a real challenge. The Testo 110 thermometer enables them to rise to this challenge and provides them with an extremely accurate means of carrying out temperature measurements at extremely low temperatures.

### **Features**

- Accurate in very low temperature ranges
- Audible alarm, user-defined thresholds
- HACCP Certified
- Clear 2 line display
